Manuel Test Plan
1. Notifications

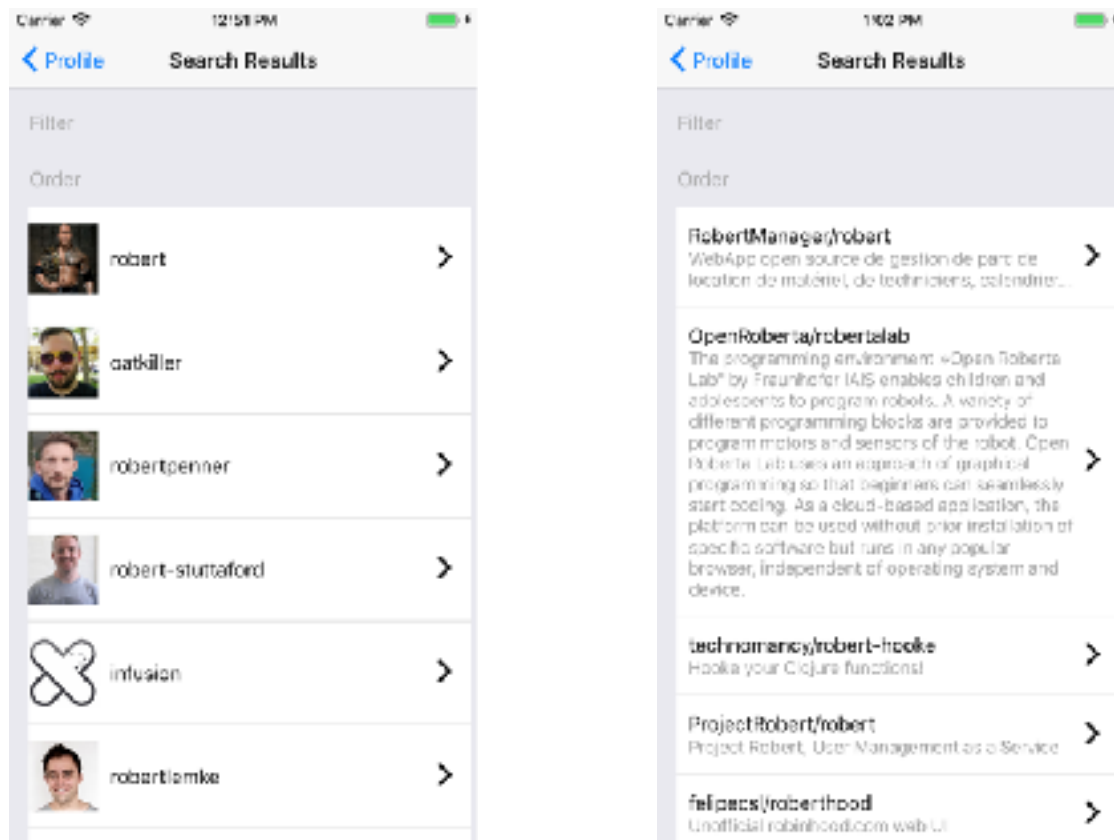

When clicking on the notification tab, it should display all the notifications with read present as a "check" and unread as an "alert" mark.
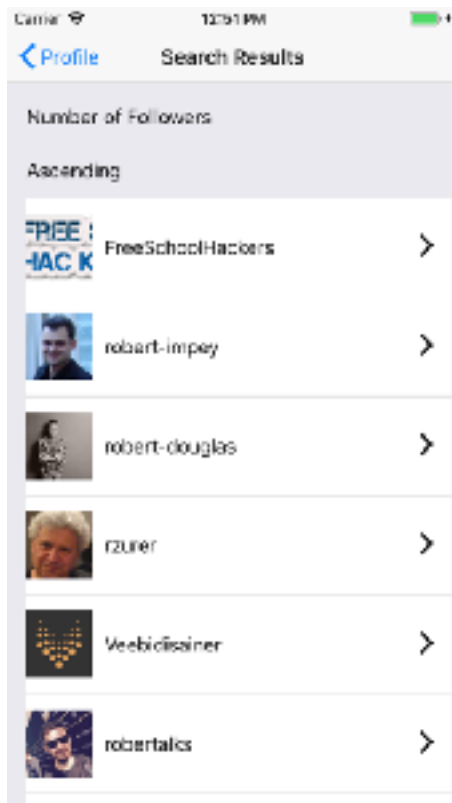

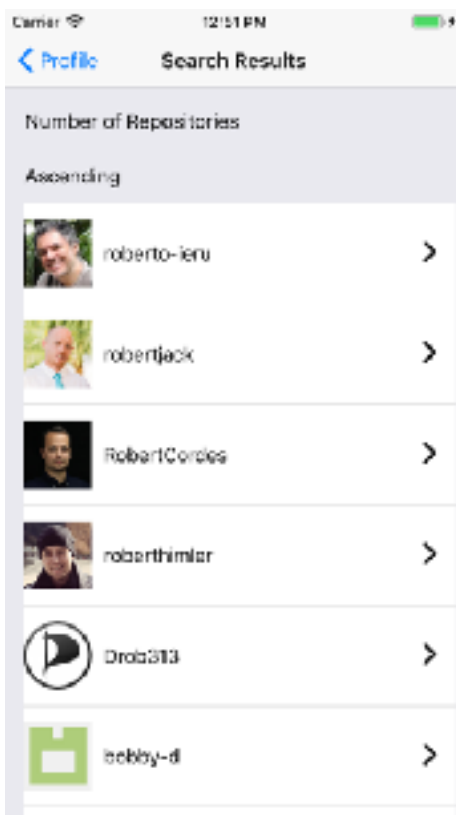

2. Search

Above on the left is search for users, and on the right is search for repositories. After clicking the search button:

Above on the left is the user search result for "Robert" without filters, and on the right is the repo search result for "Robert" without filters.

Above on the left is the user search result with filter of number of followers and order in ascending. Above on the right is the repo search result with filter of number of stars and ordered in ascending order.

Above on the left is the user search result with filter of number of repos and ordered in ascending order. Above on the right is the repo search result with filter of recently updated and ordered in descending order.

3. Data Visualization

This is data visualization of the week commitment of a "react-native" repo in bar chart and pie chart.
